

**Adding
Hashers
onto Harrier
Central**

Adding New Hashers

In order to track Run Counts and Hash Cash on Harrier Central, your Kennel needs to have Hashers in your database. You have two options to add Hashers that haven't downloaded the app:

- 1) Add them on the app
- 2) Add them on the HC Admin Portal

Adding New Hashers on App

Click on Manage Members button. This process is best for adding just a few Hashers at a run start—go to Portal option for adding a lot of Hashers at once.

Adding New Hashers on App

Click on “floating action button” (three lines in red circle on bottom right) and then Add new Hasher to Harrier Central

Adding New Hashers on App

Fill in Hasher Profile Information (feel free to use hash name for first/last names and fake email address for privacy) plus optional Profile Image and click on “Add Hasher”

Hasher Profile Information

First name (or initial)

Last Name (or initial)

Email

Hash Name (optional)

Update Profile Image

Add Hasher

Adding New Hashers on the Portal

Go to portal.harriercentral.com

The first time you need to follow the instructions to scan the QR code and then click on your Kennel. This process is ideal for adding a lot of Hashers at once.

Adding New Hashers

Click on Manage Hashers

Adding New Hashers

You can type in the individual Hashers or if you have an Excel spreadsheet with matching columns, then you can cut and paste up to 100 Hashers at once. You can also input historical run counts. This allows you to track their Run Counts, Hash Cash, etc. regardless if they ever download the app.

Kennel Members and Followers for Harrier Central Test Kennel

- Add new Hashers
- Non-app Hashers**
- Membership
- Run counts
- Notifications & Email
- Photos
- Payment Info

You can edit names and email addresses and also see invite codes for Hashers that you have entered into the system. As a security measure, as soon as a Hasher has installed the app, you will no longer be able to update this information as they will be able to do this directly through their own app.

Names and Email Address

Display Name	Hash Name	First Name	Last Name	Email	Invite Code
Goofball Tester (Just Goofy)	Goofball Tester	Just	Goofy	justtesting@harriercentral.com	DENSWF

Feel free to use hash name for first/last names and fake email address for privacy

Non-app Hashers

Non-App Hashers

If you have added a Hasher to your Kennel and they later decide they want the app, then you can share the "Invite Code" for that Hasher so they can easily connect their account with your database (found on far right under Non-app Hashers). Otherwise they could end up with duplicate accounts which will mess up their Run Counts.

[Add new Hashers](#)[Non-app Hashers](#)[Membership](#)[Run counts](#)[Notifications & Email](#)[Photos](#)[Payment Info](#)

This view allows you to set the number of times a Hasher has run before using Harrier Central (previous runs). The app will add this number to its automatically generated run count information. You can indicate whether these previous run counts are based on actual data or are estimates. You can also sort the grid by clicking on the column header. To copy and paste, select a cell and then hold the shift key down while selecting another cell to define a cell range to copy.

Run Counts

Display Name	Previous total runs	Overall total runs	Previous haring	Overall haring	Previous are estimates
Opee (James White)	0	0	0	0	No
Tuna Melt (Melissa White)	0	0	0	0	No
Wrap It Up (Rachel K)	0	0	0	0	No

Update Historic Run Counts

Update Historic Run Counts

For Hashers that you have added through the app or that have downloaded the app, you can update their Historic Run Counts, including how many times they have hared, under the Run counts tab
